

ONLINE CERTIFICATE COURSE IN eHEALTH

AKDN eHRC

AGA KHAN DEVELOPMENT NETWORK
eHEALTH RESOURCE CENTRE

About the Course

AKDN eHRC is offering a year-long online certificate course in eHealth. This course is designed to:

- build the eHealth capacities of professionals in the health sector;
- help them understand the concepts of eHealth and eHealth solutions; and
- address the challenges around eHealth service delivery in the developing world.

You will learn how to manage, administer and provide implementation oversight for eHealth programmes in low- and middle-income countries.

Course Objectives

By the end of the course, you will be able to:

- Define health and identify health care needs of low- and middle-income countries.
- Understand basic concepts of Information and Communication Technology (ICT).
- Define eHealth and discuss the importance and applications of eHealth in health care.
- Understand advance concepts of ICT and its application in health care.
- Explore the scope of eLearning and the process of setting up an eLearning programme.
- Explore the applications of telemedicine and understand the setup of teleconsultation.
- Understand the uses and potentials of mobile technologies for health care.
- Identify the role and importance of health information systems.
- Understand the process of eHealth management.
- Elucidate the concept and process of monitoring and evaluation for eHealth projects.
- Develop proposals for eHealth service delivery projects.

Who Should Attend - The course is open to all professionals from the health care sector. These include doctors, nurses, technicians, pharmacists, allied health professionals, public health professionals, biomedical engineers, researchers, academicians, administrators, managers and IT professionals, among others.

Course Structure - The course consists of 11 modules; each module will be delivered over a period of three weeks. Participants may register for specific module(s) or the entire course. Details on the modules can be found on the [course website](#). The course involves web-based learning and discussions using Moodle, a course management system.

A certificate of participation will be awarded to successful participants at the end of each module and upon completion of the entire course.

How to Apply and Deadline - Interested candidates may apply for specific module(s) or the entire course by submitting the [online application form](#) and a personal statement. The deadline to apply for the course is **Tuesday, March 08, 2016; 12:00 A.M. EST.**

Course Fee

USD **599.00**: fee for the entire course (10 modules + 1 Capstone Module)

USD **49.00**: fee for each module
USD **109.00**: fee for Capstone Module
