

CONNECT to the Center for Health Market Innovations Network

CHMI offers public access to a large, downloadable data set and opportunities to influence innovators on the ground at HealthMarketInnovations.org

BENEFITS FOR RESEARCHERS STUDYING HEALTHCARE OR SOCIAL ENTERPRISE

Access a free, up-to-date data set on the private sector in health: CHMI profiles more than 1,000 non-profits, social enterprises, public-private partnerships, and policies in over 100 countries. Search by categories including: Health focus (such as TB, HIV, or chronic diseases); Country of operation; Information technology employed; and population served. Download slices of the data set for further analysis.

Identify promising practices: CHMI has developed a framework to collect and disseminate data on program performance. Find programs reporting results in categories such as improvements in quality, utilization, efficiency, and sustainability.

Access analytic products on the private sector: CHMI shares observations on emerging practices through periodic reports, case studies, and snapshot summaries of the data related to topics like primary health care, mobile care, and non-communicable diseases.

Disseminate your findings to practitioners: More than 150,000 people have used CHMI to learn about innovative health programs and resources. People who study the private sector in low- and middle-income countries can share their research on CHMI with implementers, investors, donors, other researchers, and policy makers around the world.

Stay current on new resources: CHMI centralizes information about programs working to improve health care for the world's poor. Read and contribute to CHMI's e-newsletter and blog, which are viewed by more than 10,000 people every month.

"We are helping the Indian government's National Innovation Council to learn about the role of technology and government as levers for enabling scale. The CHMI [Highlights: 2011] report, and your database have helped us understand the space and put together a report on India specific innovation."

– Researcher,
Dasra Social Impact, Mumbai

WHO WE ARE

Center for Health Market Innovations (CHMI) promotes programs, policies and practices that improve privately delivered health care for the poor in low- and middle-income countries. Operated through a global network of partners since 2010, CHMI is managed by the Results for Development Institute. Details on more than 1,000 innovative health enterprises, nonprofits, public-private partnerships and policies can be found online at:

HealthMarketInnovations.org ›

WHAT WE DO

› INFORM

We provide comprehensive, up-to-date information about innovative programs and policies.

› ANALYZE

We identify promising practices that can be scaled-up or adapted in other countries.

› CONNECT

We connect people implementing, funding, and studying innovative programs to translate good practices and encourage innovative programs to scale.

How can you participate?

Here's how you can get the most out of CHMI

- 1 SHARE YOUR RESEARCH:** Studying the private sector or market-based health innovations? Share your research with us and we will publicize it on our blog, Twitter, and other media. Contact us at chmi@resultsfordevelopment.org.
- 2 CONNECT WITH INNOVATORS:** Ask questions and delve into programmatic details not yet public by contacting managers of CHMI-profiled programs. Register on CHMI to send a message to program managers.
- 3 DOWNLOAD THE DATA SET:** Use CHMI's data set as a basis to conduct research. Register on CHMI to download the data, and subscribe to our newsletter to keep up with the latest publications, events, and funding opportunities.
- 4 UPDATE A PROGRAM PROFILE:** Are you independently researching a program profiled by CHMI? Keep the CHMI community informed on its recent expansions by updating the program profile with a Change Request.
