Ambulance Referral

We have an ambulance that operates 24 hours and always ready for any referral with keen attention to delivery cases. We have competent drivers who are well conversant with all the routes in Siaya county.
MATIBABU FOUNDATION-KENYA is a homegrown initiative working in Kenya that provides health services that help rural hard to reach and vulnerable communities take charge of their health. Matibabu’s goal is to create a healthy, productive and prosperous society.

Matibabu foundation hospital records an average of 15,000 hospital visits per year. Health programs include:

- **Specialized Laboratory Services**
- **Pharmacy Services**
- **MCH**
- **Maternity**
- **Inpatient department**
- **Outpatient department**
- **Family planning**
- **Ultrasound**
- **Cervical cancer and breast cancer screening**
- **Special clinics for chronic illnesses**
- **Ambulance Referral**

**ANC/CWC (MCH)**

Matibabu Foundation Hospital provides antenatal care services to expectant mothers, and prepares them for maternity through targeted counselling during the ANC visits. The organization also monitors children’s growth through the child welfare clinic (CWC).

**Ultrasound**

We conduct obstetrics ultrasound to determine the position of the placenta, number of babies, condition of the baby, size of the baby and state of the amniotic fluid. This goes a long way to reduce maternal and Child mortality during delivery.

**Family Planning**

Matibabu foundation offers a wide range of family planning services both Hormonal and non hormonal. We have oral Contraceptives, injectibles (depo), Implants and IUCD. Before any of this methods are administered on a patient/client, the client is taken through counseling.

**Cervical Cancer and Breast Cancer Screening**

MFK conducts free cervical cancer screening every Friday for women between 18 years to 65 years. The services have been integrated into the family planning program, HIV/AIDS program, and MCH. The hospital has staff who are qualified to conduct both cervical cancer screening and breast examination.

**Integrated HIV/Out-Patient Department**

The OPD services are currently integrated with HIV services to ensure patient confidentiality, reduce stigma and increase retention. The hospital records an average of 15,000 visits per year.

**Specialized Laboratory Services**

This includes but not limited to liver function tests, kidney function tests, Hpylori, Culture and Sensitivity, Full haemogram services like Malaria and all HIV related lab test. The lab , CD4. In addition to the specialized lab services we conduct the routine lab can also produce quantitative test results for an array of tests for non communicable diseases (NCDs) through the i-CHROMA.

**In Patient Services**

The Matibabu Foundation Women and Children hospital has a 20-bed capacity ward housed in the Mindel Olenick Wing. The services currently record an average of 50 patients per month who come from as far as 10-13 KMs from the hospital. There are plans to expand the hospital to a 200-bed capacity inpatient department.

**Pharmacy Services**

MFK pharmacy strives to offer patient satisfaction by availing all medication for all conditions including special conditions like Diabetes and Hypertension,. Patient education on drug rational use, drug adherence and compliance. Nutritional Support through nutritional counseling and by availing ready to use supplement food, Fortified blended foods for everyone and Corn Soy blended flour.

MATIBABU FOUNDATION WOMEN AND CHILDREN HOSPITAL IS AN NHIF ACCREDITED HOSPITAL.

**Maternity services**

The maternity services have grown significantly since inception in October 2012, with 151 documented deliveries by September 2014. The organization has skillfully increased skilled hospital deliveries through increased enrollment of women into the NHIF program and the “Safe Motherhood Club”.
